

[Rolling SQL Server Error Logs WITHOUT Rebooting](#)

The screenshot shows the SQL Server Replication Monitor interface. In the background, the 'Agents' tab is selected, showing a table of agents and jobs. One agent, 'Log Reader Agent', is highlighted with a red box and shows an 'Error' status.

Status	Job	Last Start Time	Duration	Last Action
Completed	Snapshot Agent	4/2/2018 8:06:37 PM	00:00:01	[100%] A snapshot of 1 a...
Error	Log Reader Agent	4/2/2018 8:47:23 PM	00:00:00	The process could not e...

In the foreground, the 'Log Reader Agent of AdvWorksProductTrans' window is open, showing the 'Agent History' tab. It displays a table of sessions with error messages:

Status	Start Time	End Time	Duration	Error Message
Error	4/2/2018 8:47:23 PM	4/2/2018 8:47:23 PM	00:00:00	The process could not execute '...
Error	4/2/2018 8:46:22 PM	4/2/2018 8:46:22 PM	00:00:00	The process could not execute '...
Error	4/2/2018 8:45:21 PM	4/2/2018 8:45:21 PM	00:00:00	The process could not execute '...
Error	4/2/2018 8:44:21 PM	4/2/2018 8:44:21 PM	00:00:00	The process could not execute '...

The 'Error messages' section of the dialog box contains the following details:

Error messages:

- The process could not execute 'sp_replcmds' on 'NODE1\SQL2016'. (Source: MSSQL_REPL, Error number: MSSQL_REPL20011) Get help: http://help/MSSQL_REPL20011
- Cannot execute as the database principal because the principal "dbo" does not exist, this type of principal cannot be impersonated, or you do not have permission. (Source: MSSQLServer, Error number: 15517) Get help: <http://help/15517>
- The process could not execute 'sp_replcmds' on 'NODE1\SQL2016'. (Source: MSSQL_REPL, Error number: MSSQL_REPL22037) Get help: http://help/MSSQL_REPL22037
