About This Game

In 199X the world was at peace... until it all hit the fan!

When It Hits the Fan is an action arcade twin-stick shooter for PC and arcade that you can play with a friend that was inspired by many classic arcade and SNES/Sega Genesis era games.

It features four apocalypse scenarios happening all at once:

Zombies spilled out into the city streets...

AI in military grade robots went haywire...

Demons started pouring out of hell...

And finally, aliens started invading the planet!

Played through the first 2 episodes of the game so far, loving it. If you are fan of the old school games like Contra and SmashTV, this is a fantastic game. Definitely a lot of heart has gone into this game and you can feel it, when you play it. Was looking for a twin stick shooter take on those old games and this was closest so far on steam.. Old school arcade twin stick couch co op shoot 'em up ACTION! Get ready to press-start-to-continue until your thumbs bleed, divorce your significant other for stealing your lives, and cry like a baby after smashing your TV\monitor\window. IT JUST HIT THE FAN AND YOU'RE UP KID(S).. Solid arcade-like game.. Fun, old school, bullet hell shoot 'em up. Nothing is more satisfying than mowing down countless enemies. If you like those types of games you will love this one.. It was a good game. Reminds me of Smash TV with same controls.

Only problems I had were:

- * Too much stuff on the screen, so you miss things coming at your character.
- * Spawning sometimes at not where I die.
- * When my mrs died she had to wait until I died to come back which wasn't fun for her.
